DETAILED ACTION

1. Applicant's Amendment filed 11 August 2003 has been reviewed and placed of record in the file.

Allowable Subject Matter

2. Claims 1-8, 11, 13-31, 64-76, 83-86, and 79-82 (to be renumbered 1-49) are allowable over the prior art of record.

The prior art of record still fails to teach or render obvious an integrated circuit structure and a method of packaging a semiconductor device having all exclusive limitations as recited in claims 1, 64, and 70. In particular, US-PAT-NO. 5,902,690 to Tracy et al. discloses a non-volatile magneto-resistive memory positioned on a semiconductor substrate being shielded from stray magnetic fields by a passivation layer on the front surface of the non-volatile magneto-resistive memory. Thus the reference does not provide any means for protecting the back surface of the device from external magnetic field. The reference is also silent about a printed circuit board.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
